

MEDICAL EDUCATION CRT FOLLOW-UP CLINIC

Medtronic
Further. Together

TRAINING GOAL

Effectively perform advanced CRT follow-up and troubleshooting.

TARGET AUDIENCE

Experienced medical professionals in charge of CRT device follow-up and HF management.

PREREQUISITES

Solid knowledge of pacing system and troubleshooting, clinical benefits of CRT, Medtronic device algorithms, basic CRT troubleshooting and programming. At least six months of experience in CRT device follow-up.

TRAINING OVERVIEW

This interactive training, led by expert physicians, allows participants to expand their CRT follow-up skills through extensive case-based sessions. Given complex clinical scenarios, trainees will have to decide on effective application of CRT as well as evaluate disease progression and adherence to medical therapy through device diagnostics. They will optimise CRT according to patient needs to improve clinical outcomes and refine their skills to recognise and resolve complications related to CRT delivery.
